

BAKSHAM KARTHIK REDDY

LinkedIn: <https://www.linkedin.com/in/baksham>

Email: bakshamkarthikreddy@gmail.com

GitHub: <https://github.com/bakshamkarthikreddy>

Mobile: +91-8919779241

SKILLS

Languages:	Python
Web Technologies:	HTML, CSS
Frameworks:	Scikit-Learn, Pandas, NumPy, Matplotlib.
Database Tools:	MySQL
Computer Science Fundamentals:	Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks
Soft Skills:	Communication, Problem-Solver, Quick Learner, Positive Attitude

PROJECTS

E-Commerce Web Application GitHub	Nov' 2025
- Built a full-stack E-commerce web application enabling product browsing, cart management, and secure checkout for a smooth online purchasing experience. - Developed user authentication and session control, allowing customers to create accounts, log in securely, and manage their orders. - Designed a dynamic product catalog with database connectivity, supporting real-time updates for items, pricing, and availability. - Created an administrative panel to oversee inventory, track orders, and update products through a centralized management interface. Tech: HTML, CSS, JavaScript, PHP, MySQL, Node.js	
Fake Social Media Account Detection using Machine Learning GitHub	Jul' 2025
- Built an end-to-end machine learning pipeline to classify social media accounts as real or fake. - Engineered features such as follower-following ratio, bio length, and engagement metrics; performed data preprocessing and cleaning. - Trained and evaluated multiple models including Logistic Regression, Random Forest, and SVM with hyperparameter tuning. - Achieved high classification accuracy by comparing model performance using standard evaluation metrics. - Developed a real-time web application using Streamlit to display predictions with confidence scores. Tech: Python, Pandas, NumPy, Scikit-learn, Streamlit, Matplotlib	
AI-Powered Resume & Job Description Matching System GitHub	Feb' 2025
- Engineered an AI-driven resume matching system leveraging transformer-based deep learning models for semantic job-resume analysis. - Applied evaluation metrics and weighted scoring techniques to improve matching accuracy and candidate ranking reliability. - Implemented semantic similarity, TF-IDF scoring, keyword extraction, and phrase-level analysis for contextual candidate assessment. - Developed an interactive Streamlit application for resume parsing, job description processing, and analytical result visualization. Tech : Python ,Streamlit ,Deep Learning ,NLP ,Hugging Face	

TRAINING

Python Dynamics: From Algorithms to AI CERTIFICATE	July'2025
- Internship covering Python, algorithms, and basic AI concepts. - Learned core Python programming concepts including variables, loops, functions, and object-oriented programming. - Worked with basic data structures such as lists, dictionaries, stacks, and queues.	

CERTIFICATIONS

ChatGPT-4 Prompt Engineering – Infosys CERTIFICATE	Aug'2025
Master Generative AI & Generative AI tools (ChatGPT & more) CERTIFICATE	Dec'2025
Build Generative AI Apps and Solutions with No-Code Tools CERTIFICATE	Dec'2025
Web Development Fundamentals – Free Code Camp CERTIFICATE	Nov'2023

ACHIEVEMENTS

- Maintained 32+ day Leet Code streak, regularly solving data structures and algorithms problems to improve analytical thinking and coding efficiency

EDUCATION

Lovely Professional University	Phagwara, Punjab
B-Tech in Computer Science (AI & ML): CGPA:6.97	Since Aug' 2023 –Present
Narayana Junior College	Vijayawada, India
Intermediate: Percentage: 89.6%	April 2020 – March 2022
Narayana English Medium School	Kurnool ,India
Matriculation: Percentage: 100%	April 2012 – March 2019
